

Specialty Crop Access to U.S. Markets: A Case Study of Indian Mangoes

By United States Department of Agriculture (USDA) Economic Research Service (ERS)

Bibliogov Mrz 2013, 2013. Taschenbuch. Book Condition: Neu. 246x189x3 mm. This item is printed on demand - Print on Demand Neuware - The Economic Research Service (ERS) is part of the U.S. Department of Agricultural (USDA). Its focus is to analyze and distribute economic information and research. Their results provide decision makers the information they need to run business, create policies and understand the farm, rural and food economy. Certain specialty crops produced in other countries have gained better access to U.S. markets since 2007, when USDA's Animal and Plant Health Inspection Service changed its regulatory protocols for phytosanitary (plant health) concerns. One treatment option allowed under the 2007 protocols is irradiation. Using the example of U.S. imports of Indian mangoes, we examine the role of irradiation in mitigating pest risks from imported fresh produce, the costs associated with treating, shipping, and marketing fresh produce imports in the U.S. market, and the resulting increased availability and lower costs of Indian mangoes for U.S. consumers. 42 pp. Englisch.
